

**WORLD  
WATER DAY IS  
ABOUT  
EDUCATION**

# WHY IS THIS IMPORTANT?

 75% of the Earth's surface is water, but we can only drink 1% of it! A lot of water is salt water or ice.

 We need to share this water with about 7 billion people.

 884 million people haven't got clean water near their homes.\*

 4.5 billion people haven't got a toilet in their houses.

 A baby dies every minute because of dirty water.

# **WORLD WATER DAY**

**World water day is on 22 March.**

**It teaches people about water and why we need to conserve it.**

**We are lucky in our country because we've got clean water. Millions of people in the world haven't.**

# WATER WORLD DAY

The background of the slide is a deep blue color. In the center, there is a single water droplet that has just hit the surface, creating a series of concentric ripples that spread outwards. The droplet is captured in a way that it appears to be suspended in the air just above the surface, with a small reflection of it on the water below. The overall effect is a sense of freshness and purity.

We need to share this water with about 7 billion people.

World water day is about education, but it's also about raising money.

Raising money is a really good charity. it helps people in Bangladesh, they've got water, but a lot of the water is dirty, and they can't drink it.
